Pillars of Transparency and Authenticity

Provenance

The basic trustworthy facts about the origins of a piece of digital content (image, video, audio recording, document)

Provenance

Proving what is real (as opposed to detecting what is false)

Content Credentials

1. Capture

Work with manufacturers to integrate CAI into smartphones and cameras.

2. Edit

Integrate CAI into editing tools, both Adobe products and others.

3. Publish

Publishing systems maintain CAI metadata throughout their platforms.

4. Trust

Clear & universal user experience reveals provenance information.

Content Credentials

1. Capture

Work with manufacturers to integrate CAI into smartphones and cameras.

2. Edit

Integrate CAI into editing tools, both Adobe products and others.

3. Publish

Publishing systems maintain CAI metadata throughout their platforms.

4. Trust

Clear & universal user experience reveals provenance information.

Viewing content credentials  at any point in the content's journey shows what (if anything) was done to change the asset.

Provenance

content credentials

What about AI?

Wait, where did this image come from?

Deepfakes. Voice cloning. Synthetic media. It's hard to tell what's accurate and authentic these days.

2 Invalid video Content Credentials or assets

This sample shows how the Content Credentials player can surface important information to viewers when there are issues with a video's Content Credentials or segments within a video.

Secure Metadata

Assertions

What was done to an image, by whom, when etc.

Asset Hashes

Cryptographically bind assertions to image using unique codes

Content Credential

Bundle of assertions, asset hashes & digital signatures

Secure Metadata Location

File

Can be stored in the file

Cloud

Stored in the cloud - with pointer from file to cloud. Thumbnail of file stored for recovery of Content Credential

Blockchain

Distributed ledger

The Coalition for Content Provenance and Authenticity (C2PA)

- ▶ Standards organization
- ▶ Within Linux Foundation
- ▶ Adobe on Steering Committee & Chairs TWG
- ▶ V1.0 C2PA Specification Released on Jan 2022

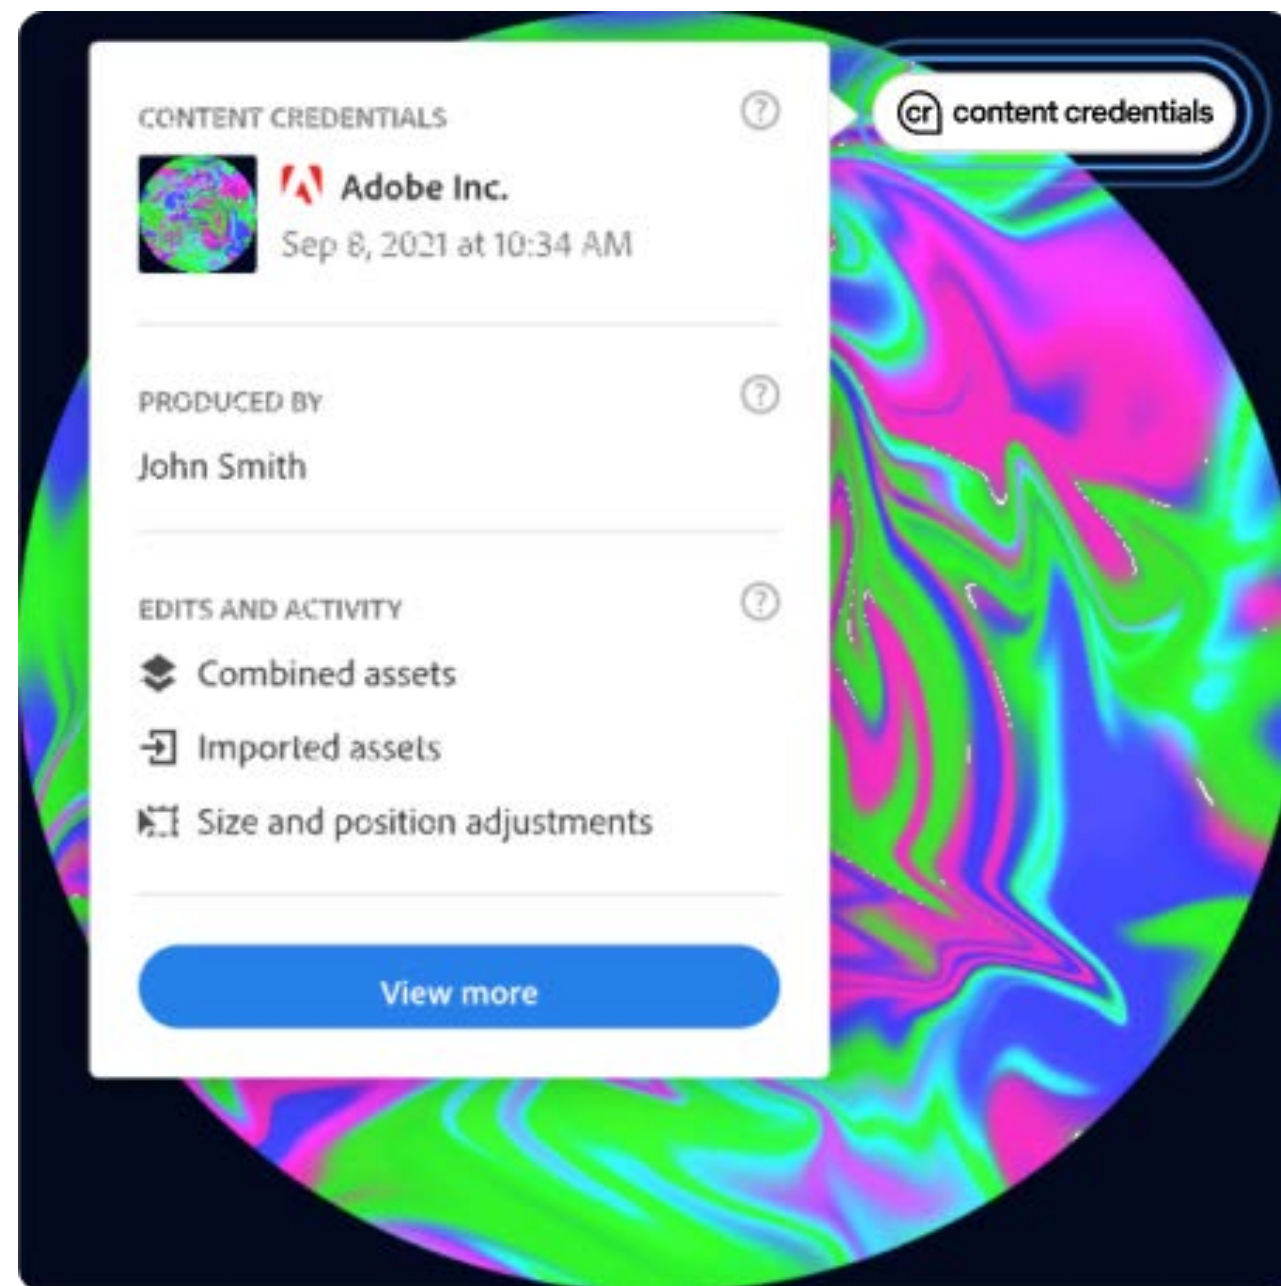

All have announced implementation

Content
Authenticity
Initiative

Open-source tool 1: JavaScript UI Kit

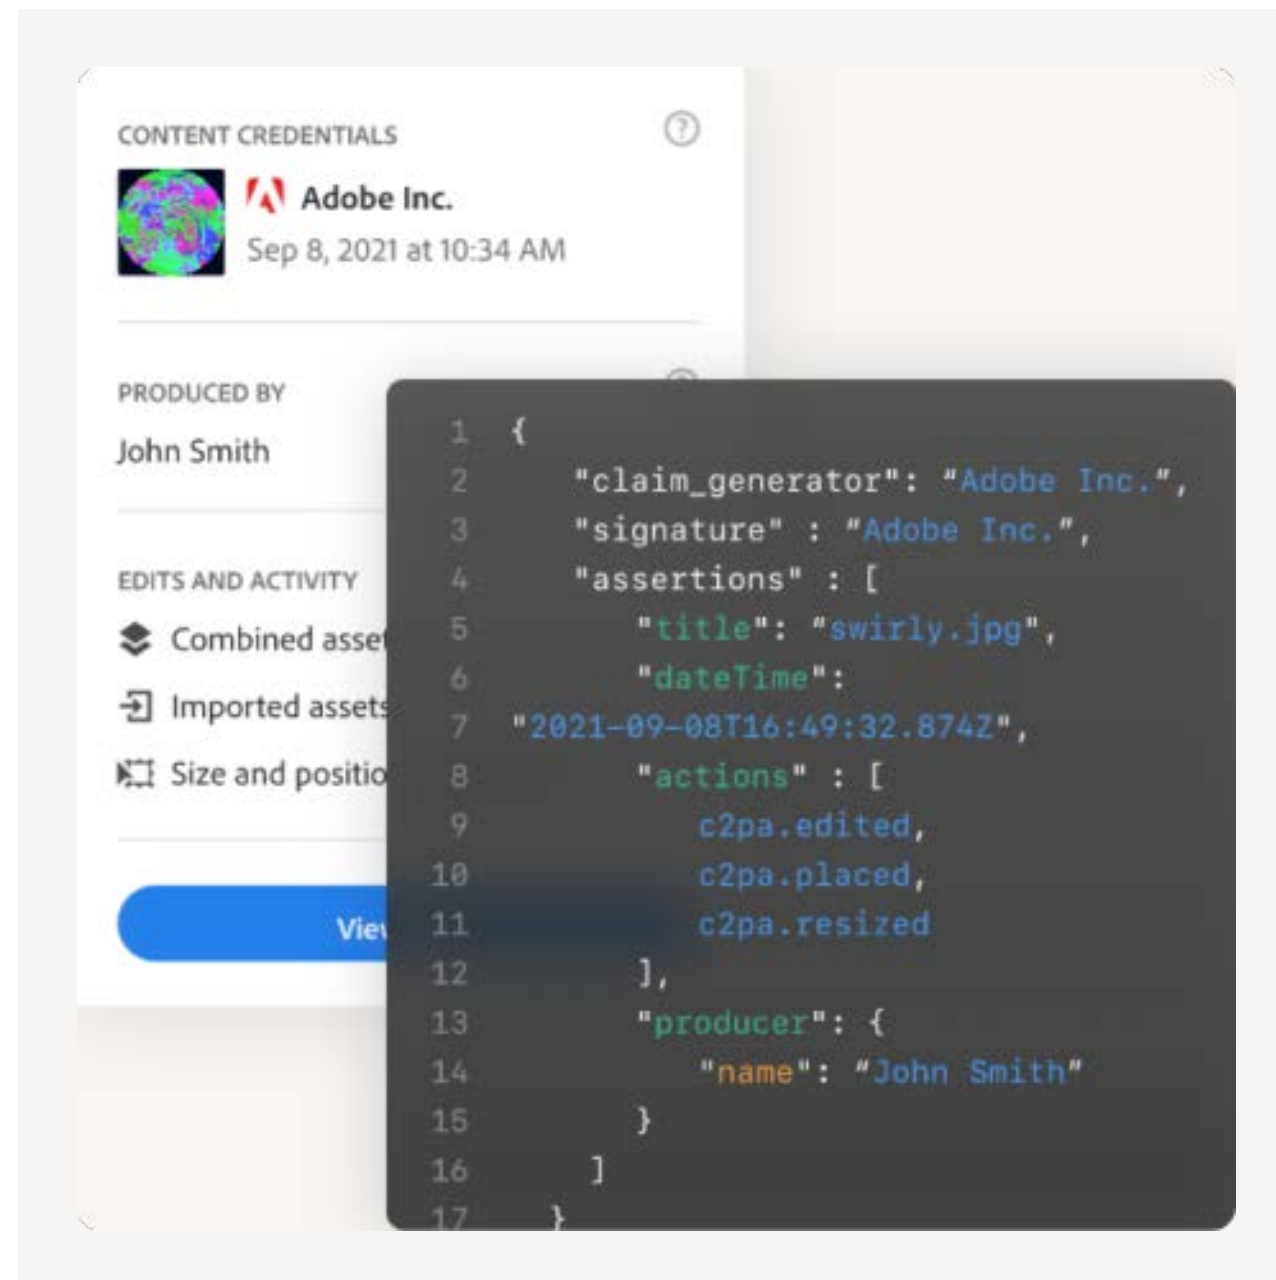

Install to create, verify and explore content credentials on your command line. Or wrap it into a service to quickly equip your processes to interact with content provenance.

Implementors will use to

Display Content Credentials on your site or app

Link Content Credentials displayed on your site or app to Verify

Open-source tool 2: C2PA Tool

Everything you need to develop rich, browser-based experiences with content credentials.

Implementors will use to

Display Content Credentials on your site or app

Link Content Credentials displayed on your site or app to Verify

Write Content Credentials data into files

Quickly create and inspect Content Credentials data

Open-source tool 3: Full SDK

Develop custom applications across desktop, mobile, and services that create, verify, and display content credentials via our powerful Rust library.

Implementors will use to

Display Content Credentials on your site or app

Link Content Credentials displayed on your site or app to Verify

Write Content Credentials data into files

Quickly create and inspect Content Credentials data

Customize displaying and creating Content Credentials data, with the full power of the specification

Deploy on Web, mobile, and desktop
