monokey – a scale up by Athesys

-  Athesys (system Integrator)
 - IAM consulting with third party products

- Customer sectors: Banking, Insurance, Education, Automotive and Manufacturers

- Monokee (vendor)
 - ~500k licenses sold on Italy
 - All use cases related to centralized / federated model
- Some customers:

- Played with decentralization since 2018.
- Now we take it very seriously

technical overview -- *monokee meets SSI* ---

what we offer and where are we headed to

~> whoami

Dr. Mattia Zago PhD

Solution Architect @ monokee

Leading R&D project on SSI

- Cybersecurity
- Artificial Intelligence

Visual Identity Orchestrator

Drag & Drop builder aim at *codeless* integration

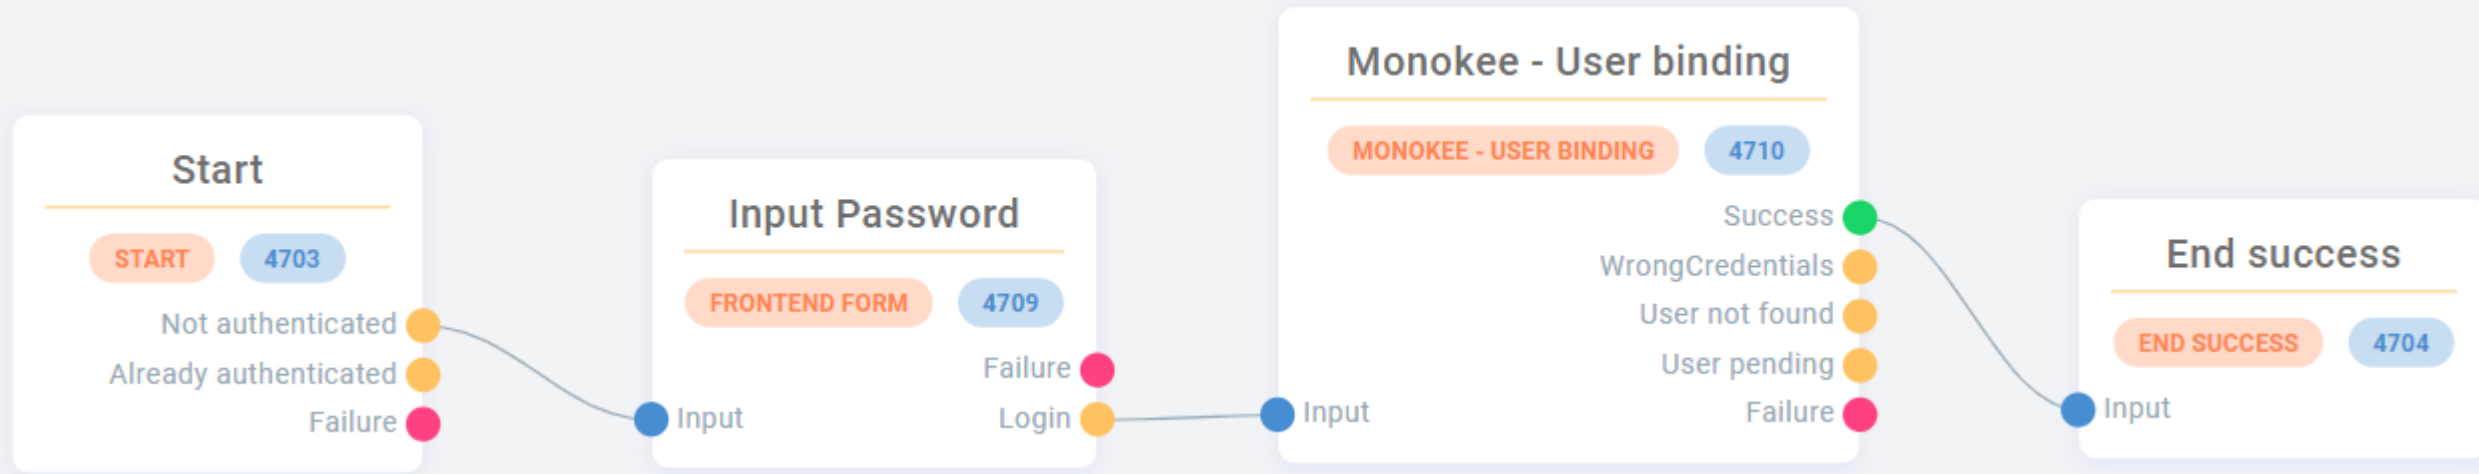

We support **all** major protocols.

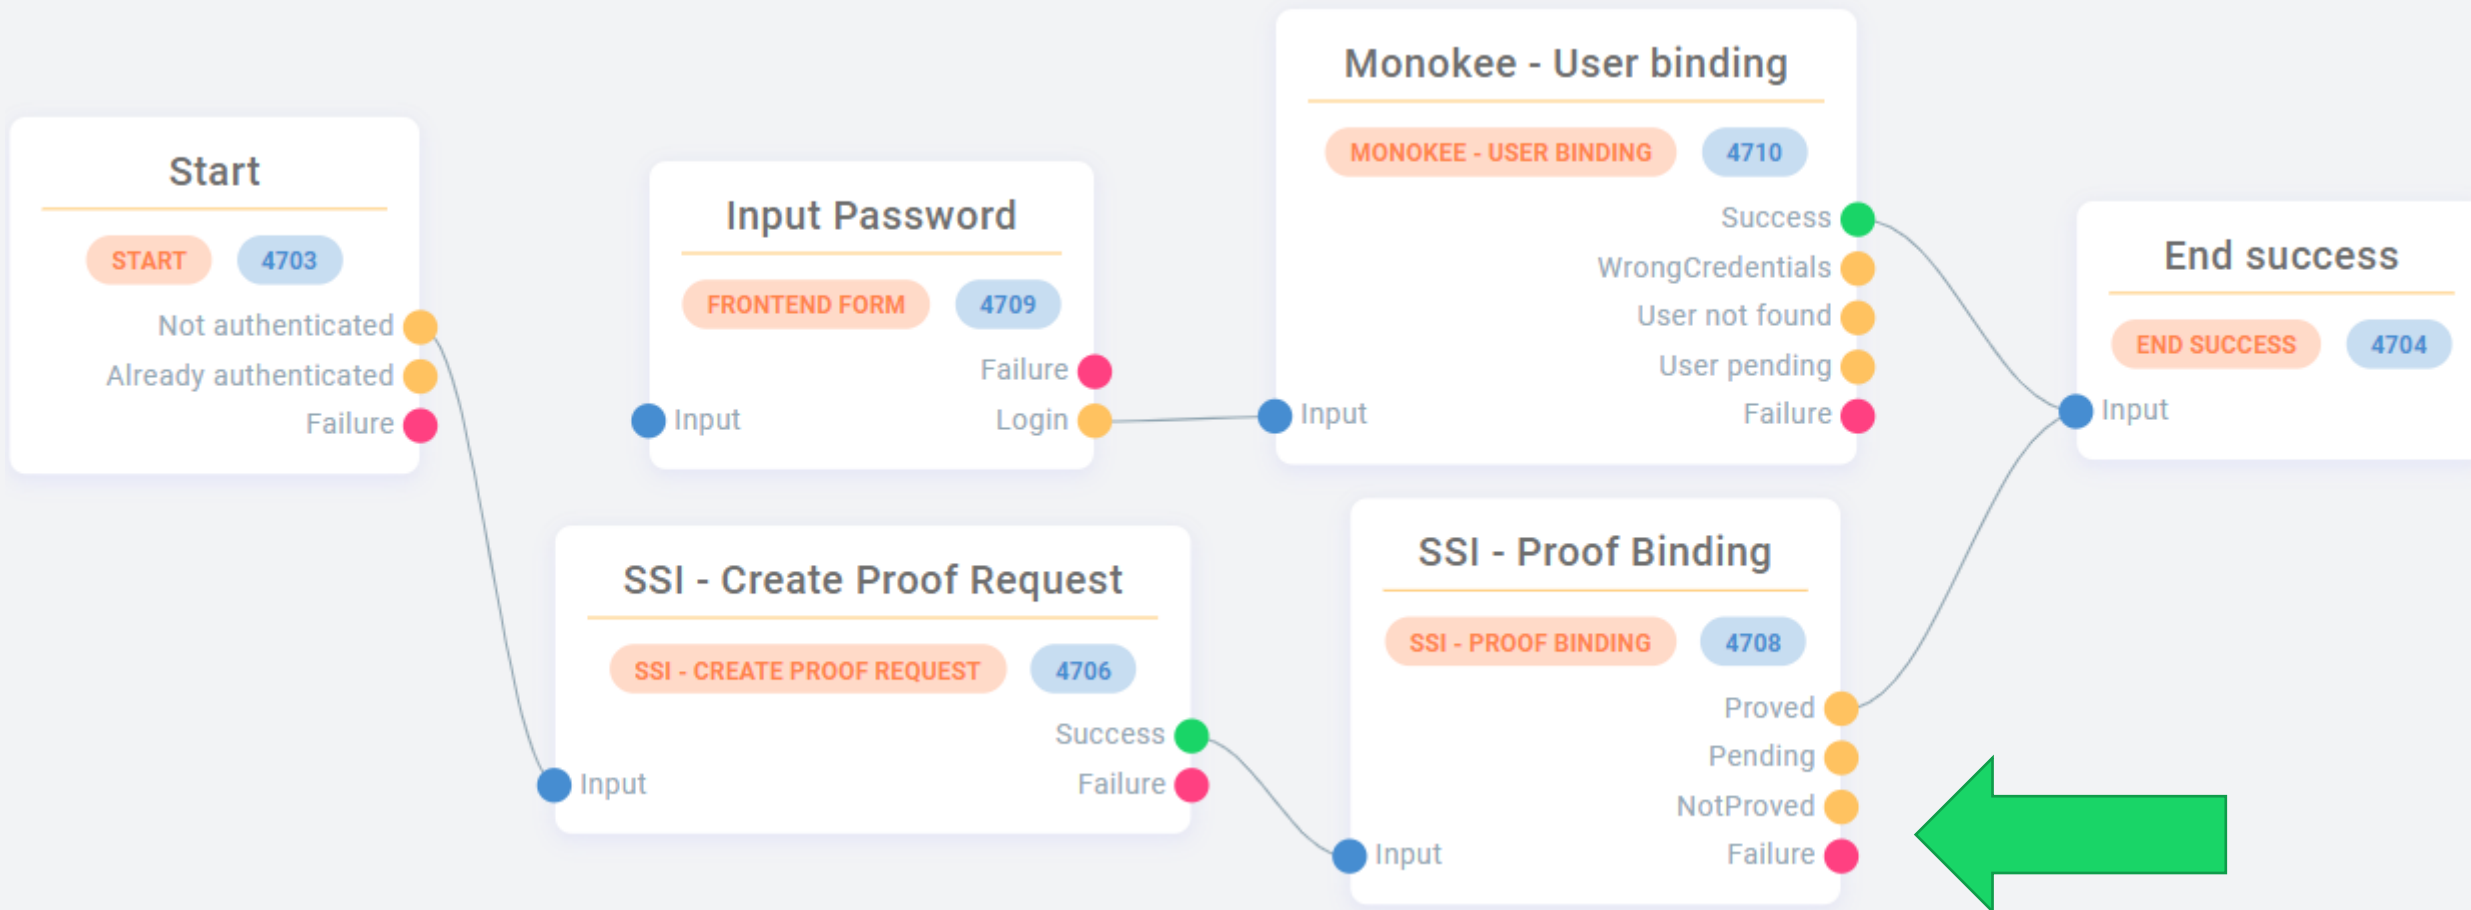

We **are certified** for most of them.

monokee meets SSI – classic password flow

monokee meets SSI – hybrid future present

Either ephemeral identity
or IdP lookup and bind

Roadmap WEB3.0

KYC **JiT Identity**

Decentralized PAM

Hybrid federated-decentralized identities projects

ViCura 4.0

UNIVERSITÀ DEGLI STUDI
DI NAPOLI FEDERICO II

dizme

What can we do in ToIP?

1. Provide our knowledge and experience with “legacy” centralized and federated identity
2. Join discussions and task forces on multiple subjects
 - We are already contributing to the Technical Architecture Task Force
3. ... let us know!
