Antitrust Policy Notice

› Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

› Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

What is a Database Model?

A **database model** shows the logical structure of a database, including the relationships and constraints that determine how data can be stored and accessed. Common kinds of data models include Hierarchical database model, Relational model, Network model, Object-oriented database model, Entity-relationship model, Document object model, Entity-attribute-value model, Star schema and Object-relational database model.

The semantics of these common database models can be harmonized using OCA

Setting up an *OCA-CDISC Focus Group* for clinical research database model harmonization
(10 mins)

Presented by: P.Knowles

https://oca.colossi.network | https://www.cdisc.org

What is CDISC?

The **Clinical Data Interchange Standards Consortium** (**CDISC**) is a standards developing organization (SDO) dealing with medical research data linked with healthcare, to "enable information system interoperability to improve medical research and related areas of healthcare". The standards support medical research from protocol through analysis.

DSWG representative for the new Operations Team

Request for a participant from the SDWG to put their name forward as a representative for the new **ToIP Operations Team**

The purpose of the Operations Team is to create a small group of ToIP members who will share information on the workplans of our WGs, help ensure that draft deliverables are advancing as intended through the stages of the ToIP workflow, resolve any bottle-necking that arise around decision-making/approvals and discuss issues such as (for example) introducing firmer parameters for the creation of Taskforces under all WGs.

The Operations Team will not be directing or otherwise interfering with the development of content and deliverables in the WGs themselves.

Leadership positions

› As a Working Group, we elect our own Chairs and Vice-chairs

  › At least one, and up to three

  › Two or three is recommended to spread out the load

› We can periodically rotate chairs as needed

› Volunteer via the meeting page at …
