Trust Over IP Foundation

This wiki is one of our primary collaboration tools. Use it to learn more about the project; explore, manage, or contribute to Working Groups or Task Forces; and share helpful links or other content.

Working Groups

- Governance Stack Working Group
- Technical Stack Working Group
- Utility Foundry Working Group
- Ecosystem Foundry Working Group

Proposed Working Groups and Task Forces

- Communications Working Group (Proposed)
- Concepts and Terminology Working Group (Proposed)
- Decentralized Semantics WG (Proposed)

All Members

- All-Members Meeting Page
- How to Propose a New Working Group or Task Force

Learning Confluence

The sections below contain training information for this Confluence wiki.

Know your spaces

Everything your team is working on - meeting notes and agendas, project plans and timelines, technical documentation and more - is located in a space; it's home base for your team.

A small team should plan to have a space for the team, and a space for each big project. If you'll be working in Confluence with several other teams and departments, we recommend a space for each team as well as a space for each major cross-team project. The key is to think of a space as the container that holds all the important stuff - like pages, files, and blog posts - a team, group, or project needs to work.

Know your pages

Quick navigation

When you create new pages in this space, they'll appear here automatically.

- All Members Meeting Page
- Communications Working Group (Proposed)
- Concepts & Terminology Working Group (Proposed)
- Decentralized Semantics WG (Proposed)
- Ecosystem Foundry Working Group
- Governance Stack Working Group
- How to Propose a New Working Group or Task Force
- Steering Committee Meeting Page
- Technical Stack Working Group
- Utility Foundry Working Group

If you're working on something related to your team - project plans, product requirements, blog posts, internal communications, you name it - create and store it in a Confluence page. Confluence pages offer a lot of flexibility in creating and storing information, and there are a number of useful page templates included to get you started, like the meeting notes template. Your spaces should be filled with pages that document your business processes, outline your plans, contain your files, and report on your progress. The more you learn to do in Confluence (adding tables and graphs, or embedding video and links are great places to start), the more engaging and helpful your pages will become.

Learn more by reading Confluence 101: organize your work in spaces

| Confluence 101: discuss work with your team | Getting a project outlined and adding the right content are just the first steps. Now it's time for your team to weigh in. Confluence makes it easy to discuss your work - with your team, your boss, or your entire company - in the same place where you organized and created it. |
| Confluence 101: create content with pages | Think of pages as a New Age “document.” If Word docs were rotary phones, Confluence pages would be smart phones. A smart phone still makes calls (like their rotary counterparts), but it can do so much more than that |

Tasks

- Customize the name, colour, and icon of Confluence.
- Decide who can see and edit this space or a specific page by clicking the icon. Learn more about Page Restrictions and Space Permissions.
- Try adding an inline comment by highlighting some text and click the comment icon.
- Learn more about inviting your team Confluence.
