Utility Foundry Working Group

Mission and Scope (as defined in the WG charter)

The scope of the Utility Foundry Working Group is to facilitate a community of practice among governance authorities, implementers, operators, and service providers for Trust over IP Layer One utilities. The WG will provide process guidance for the establishment and monitoring of new ToIP Layer One utility projects, whether hosted at the Linux Foundation or external to it. Other WG activities will include creating template RFPs for service providers, maintaining a list of affiliated Foundry Service Providers, identifying areas of collaboration and alignment between associated and/or disparate Utilities, and where possible serving as a center of competence for the education and promotion of the role of ToIP Layer One utilities.

Conveners

- André Kudra

Chairs

- Co-Chair: Dan Gisolfi (IBM)
- Co-Chair: André Kudra (esatus)
- Co-Chair: Vinod Panicker (Wipro)
- Vice-Chair: Cameron Boojarjomehri (MITRE)
- Vice-Chair: Mathieu Glaude (Northern Block)
- Vice-Chair: Sandeep Krishnappa (Infoeaze Digital Services)

Membership and Joining

Prior to participating in the meetings please ensure that you are a member of the Trust Over IP Foundation. More detail on this can be found at this link.

To join at the Contributor Member level, there is no charge, and you do not need to join the Linux Foundation.

- If you wish to join as a Contributor Member only, please see these documents.
- If your organization is already a member of The Linux Foundation please see these documents
