Her taking and the standard of the change of the All Council for BIMA, Co-Chair of Council for Biman, the future needs you! The social, economic and political impact of technology over the last decade has resulted in a number of cascading consequences that have been deviating at worst and cringe-worthy at best. While ethical principles and frameworks have been helpful, many practitioners have found them really difficult to 'action' in order to improve design outcomes and the overall human experience. This talk takes aim at confusion and uncertainty by providing practical guidence and examples of how to implement ethics in the creation and design of technology.
