2 5 m ins	Special topic #1		EIDAS blog post - lots of discussion (bad notetaker) - short summary: - Action is to create 2 work items: - blog post - quick response - great start, but have you considered... - e.g. with high certification bar have you just created/reinforced a monopoly/duopoly (Apple + Google). - if the credential can be trusted, can I put it in any wallet? - ICAO DTC - is used at point-of-inspection so THEY are doing "binding" to the person that is there. - Bart: "ICAO is about inspection-centric, digital ID for EU is issuance centric. I would argue there's also a single use-case vs general purpose use difference." - Are we solving somebody else's problem? - What is the CTA - let's get together. - Position Paper - 4-pager (rough size) - but is this "yet another position paper" - Is this a TSWG-level issue - can we get things started - Bart Suichies and Antti Kettunenwill work to create a rough draft this week and we can reach out more broadly... - Darrell to assist by reviewing and circulating internally (GSWG, EFWG, HXWG, Communications Committee) and potentially externally (MyData Global, DIF, Canada's CIO Strategy Council, etc.)
5 m ins	Any other business		Vikas - pushing forward on IEEE cybersecurity group - IEEE is supportive and 2-year activity is likely to kick off. Alignment with ToIP: - decentralization of identifiers - we will want to keep an eye on this - Vikas will share more informal
5 m ins	- Review decisions /action items - Planning for next meeting	Ch airs	key item
