22/05/17 Workshop

RECORDING GOES HERE (North America / Europe):

https://drive.google.com/file/d/1_tkRxcHmUw0QW7gc63WPpDfAlwCz-qSK/view

Attendees

- Alex Tweeddale

- Tim Bouma
- Daniel Bachenheimer
- Joachim Miller
- Scott Perry
- Felipe Pinto

Goals

- Lay out key questions around Layer 1 Governance that need to be addressed
- Lay our key risks around Layer 1 Governance that need to be addressed
- Formulate a skeleton for the Layer 1 Governance template

Miro Board

https://miro.com/app/board/uXjVO0FjhCs=/

Antitrust Policy

Decision Points

- Alex to collate work from Miro board and put together action items

Discussion Items

- ☐ Business: Incentives are important but there needs to be a Governance process to ensure that work is done in the interest of the community, rather than the interest of a select few
- ☐ Legal: GDPR and data protection is highly important. However, there is plenty of new legislation being written, so perhaps law should not be too big a resticting factor
- ☐ Social: ESG and environmental sustainability should be an important consideration
- ☐ Technical: Interoperability and trust = adoption
- ☐ Governance processes: Voting must be fair and tamper-resistant
- ☐ Other: Room should be made for IoT and Legal identity governance

Open Items

Low priority items that failed gain volunteers to champion cause.
