

Ecosystem Layer-4 Governance

Digital **TRUST** Ecosystem Components

- | | |
|------------------------------|--|
| 1. Digital Organisational ID | e.g. Organisation X |
| 2. Governance Framework | e.g. agrees to the ecosystem rules, |
| 3. Trust Registry | e.g. and signs the Registry to formalise that commitment |
| 4. Schema(s) | e.g. so when they issue a statement, |
| 5. Verifiable Credentials | e.g. you know it has <u>integrity</u> . |
| 6. Tangibility TopIs | e.g. and there are ways for you to verify it. |

Governance is always **Context Specific** and should be identified in the **Purpose & Objective** section of any Governance Framework
