

# EFWG 2022-06-09 Meeting

## Meeting Schedule

- Bi-Weekly at 8:00-9:00 am PST / 11:00-12:00 am EDT / 15:00 – 16:00 UTC / 17:00 - 18:00 CET
- <https://zoom.us/j/95389236256?pwd=RFErMm9SS0tBenA1Q0dSYpXK3Bqdz09>

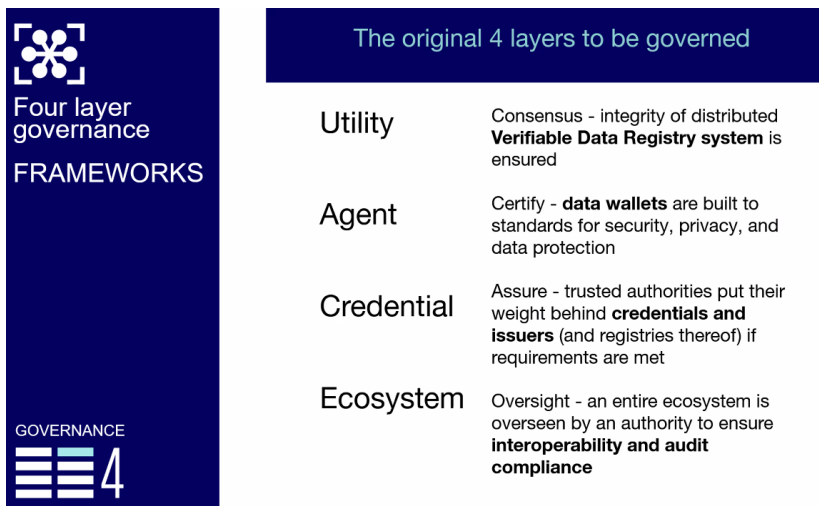

## Attendees

- [Steve Magennis](#)
- [Carly Huitema](#)
- [P Subrahmanyam](#)
- [Eric Drury](#)
- [Phil Wolff](#)
- [Trinh Nguyen](#)
- [Jorge Flores](#)
- [Vlad Zubenko](#)
- [Vladimir Simjanoski](#)
- [Drummond Reed](#)
- [P A Subrahmanyam](#) [P A Subrahmanyam](#)

## Agenda Items

- Welcome & Introductions
- EFWG Community Topics
  - Governance-across-the-layers meeting is coming up.
- What is a ToIP Ecosystem?

Carly: we started with this...

and this produced descriptions like these...

## What is our Ecosystem Definition? (1st drafts)

*What makes it TolP? Trust layer  
(not necessarily decentralized)*

Where a group of ecosystem members agree to create and cooperate under the direction of a governance authority to apply TolP layers 1, 2 and 3 to meet their needs.

---

Layers 1, 2 and 3 are Utility, Agent, and Credential

---

Where a group of ecosystem members agree to create and cooperate under the direction of a governance authority to apply Verifiable Data Registry systems, data wallets, and credentials to meet their ecosystem needs. (??)

---

A purposeful and clearly delineated network of digitally identifiable entities who agree to common protocols for the exchange of specific types of information, governed by a governance framework and underpinned by a trust registry both of which ensure the overall integrity of the actors and actions of the ecosystem – both of which can be verified.

---

Etc ...

Eric came up with the last paragraph. Required elements.

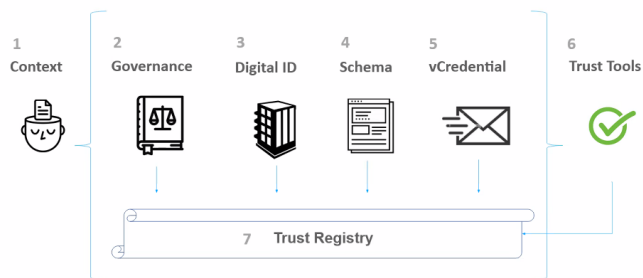

- Purposeful
- Clearly delineated
- Consent to protocols
- Scope on information types
- Governance framework (what's that?)
- Trust registry

Prior art, [Trinh's paper draft](#).

Eric describes an ecosystem as having seven parts...

## Digital Trust Ecosystem

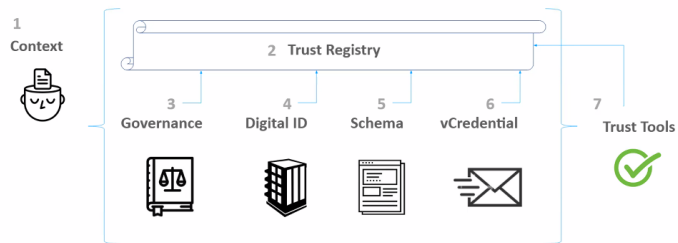

A digital trust ecosystem is a purposeful and clearly delineated network of digitally identifiable entities who agree to common protocols for the exchange of specific types of information, governed by a governance framework and underpinned by a trust registry both of which ensure the overall integrity of the actors and actions of the ecosystem – and which can be verified.

Perhaps the trust registry holds the ecosystem...

# Digital Trust Ecosystem

A digital trust ecosystem is a purposeful and clearly delineated network of digitally identifiable entities who agree to common protocols for the exchange of specific types of information, governed by a governance framework and underpinned by a trust registry both of which ensure the overall integrity of the actors and actions of the ecosystem – and which can be verified.

Drummond: Not all ecosystem governance requires onboarding with contractual consent.

Phil: Consent to governance may be implicit, de facto, or by government fiat (laws/regulations).

Drummond: How broad is "Digital ID", narrow DID or [broadly like OpenID's definition](#).

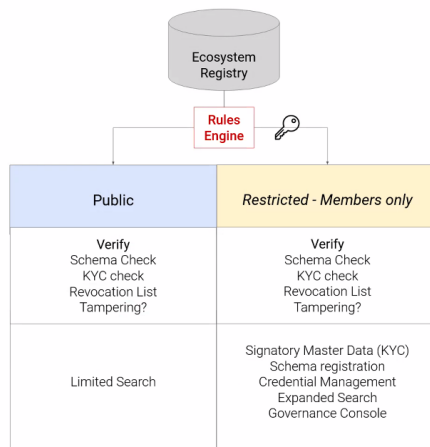

What are Trust Tools? Wallets, agents, and other tools.

Carly: There can be several trust registries - you might want to use external registries like a state identification

Drummond: "Context" is reduced to "Scope" in ToIP gov framework language.

Drummond: Trust List is an EU subset of Trust Registry

## Trust Registry

- Q&A

## Presentation Files

- [Learning Pathways Taskforce](#)

## Recording

- [Meeting Recording](#)

## Meeting Notes

### Welcome & Introductions

- Notes

### EFWG Community Topics

- Q&A

**Admin Reminder** : remember to re-subscribe to new meeting calendar

If you want your name on the invite, reach out to [Elisa Trevino](#) (on slack), she will put your name in the calendar invite to make sure that the invite is sent out each time.

## Coming up

- Next presentation: TBD
