

2022-06-30 Human Experience WG Meeting

16.00 UTC = 9:00 PT = 12.00 ET = 18:00 CEST = 21:30 IST Zoom Meeting Link <https://zoom.us/j/99429712733?pwd=K214bTM4cG54YzZYVnZCL1I5MEdQQT09>

Meeting Recording

Main Goal of this meeting: Working session

Attendees: Andrew Slack Kalin Nicolov Nicky Hickman Vikas Malhotra Phil Wolff Jacques Bikoundou

Time	Item	Lead	Notes
5 mins	<ul style="list-style-type: none">• Welcome & antitrust notice• Agenda review	Kalin	<ul style="list-style-type: none">• Antitrust Policy Notice: Attendees are reminded to adhere to the meeting agenda and not participate in activities prohibited under antitrust and competition laws. Only members of ToIP who have signed the necessary agreements are permitted to participate in this activity beyond an observer role.• Join ToIP if not already a member<ul style="list-style-type: none">◦ Consent to meeting recording?
10 mins	Intro's & Updates	Kalin	<p>SSI Harms Whitepaper TF Update (Nicky) TF Wiki page link</p> <ul style="list-style-type: none">• White paper now outlined and main body of writing will happen in next month• Use of Rumsfeld approach to structure<ul style="list-style-type: none">◦ Phil: perhaps call it the Johari window? (Fewer war crime associations.)• Now defining key #harms-tf terms and mental model for like agency, power, human harm, resilience, livelihood assets and vulnerability see our Miroboard here• Direct feedback based on interviews with indigenous people for grassroots input (edge case)• As usual all contributions warmly welcome <p>Vikas Malhotra queried purpose of Harms TF and highlighted issue about over vs under-identification</p> <p>Phil Wolff commented:</p> <p>harms from identity vs. decentralized identity can we reference harms arising from the SSI principles (http://www.lifewithalacrity.com/2016/04/the-path-to-self-sovereign-identity.html) and ToIP design principles (https://trustoverip.org/blog/2022/01/24/the-trust-over-ip-foundation-publishes-new-introduction-and-design-principles/)</p>
5 mins	EFWG x-pollination	Andrew	<p>Presentation Ecosystem Components</p> <p>Document Ecosystem Components</p> <p>Anyone in the group willing to support this work of the EFWG also possibility of sharing a session with them that</p> <p>Phil Wolff commented: It's not clear to me that there are mechanisms for "ecosystem cohesion". feedback loops (and corrective systems) that keep an ecosystem stable. e.g. detecting a DDOS attack on a registry and responding well. or detecting a human harm. or cryptographic assumptions are no longer true (see quantum computing).</p> <p>Andrew Slack important to use opportunity to understand the interactions and relationships that occur across the domain and eco-system. So work some x-pollination with the group to define how the other two work together</p>

5 m ins	HXWG Terms Wiki	N ic ky	<p>We now have our HXWG Terms wiki</p> <p>This is the CTWG process - there is a toolbox building around it.</p> <h3>Data Lifecycle</h3> <p>The diagram illustrates the Data Lifecycle with four stages: ingest, curate, produce, and process. A dashed vertical line separates the first three stages (CTWG responsibility) from the last stage (external responsibility). Below each stage are descriptive terms: ingest (denormalized, simple), curate (normalized, complex), produce (denormalized, complete), and process (user friendly). Below the stages are four boxes representing artifacts: a Term/Phrase box with fields for Agent, Definition, and Usage example; a Concept box with fields for id, short def, longer explain, diagrams, and links; a Term box with fields for id, concept id, value, all forms, lang, tags, and notes; and a processed artifact box (e.g. glossary with custom CSS).</p> <p>Nicky Hickman is a guinea-pig at the CTWG and so familiar with process etc. I am one of the curators but need at least one other to work with me. Any volunteers!?</p> <p>Andrew Slack agreed to act as co-curator</p> <p>What are the key concepts and terms we want to work on? (e.g. human experience, autonomy, bodily autonomy, socio-technical system),</p> <p>What are the ingestion methods we want to use? e.g. g-docs or confluence wiki?</p>
1 5 m ins	Implementers	K al in	<p>After the summer we will run a series of interviews with SSI implementers.</p> <p>Here is our wiki page for adding questions</p> <p>Potential x-over with EFWG work on implementers, they have already had Trinsic for example</p>
1 5 m ins	Deliverables	A n d r e w	<p>Scenarios - nearly complete, where should it be stored? how does it iteratively grow and develop, get feedback etc?</p> <p>Nicky Hickman voted for confluence wiki</p> <p>Phil Wolff asked who it is for.</p> <p>Nicky Hickman suggested a panel discussion to introduce the deliverable with a short video as a complement</p> <p>Expert series reflections</p> <p>What have we learnt, how this has helped us in definition & scoping of HXWG - try to deliver over the summer - any contributors very welcome.</p> <p>Phil Wolff is working on "Consent Doesn't Scale" for mid July</p>
1 0 m ins	Close & Actions	K al in	<p>Andrew Slack to round off the scenarios deliverable and add to wiki</p> <p>Nicky Hickman to add Andrew as a curator in HXWG</p> <p>Stay in touch with EFWG</p>
