#1

Notes:

Dan discussed European Identity Conference: TSP brought up. Judith set up a poll. Nobody heard of trust spanning protocol later. Everyone thought it would be important. Discussed trust tasks. Audience: understood the importance of it. Identity and access management. Half the discussions were on Decentralize Identity and SSI. SD-JWTs. [Mathieu Glaude](#) "Seems like "verifiable credentials" have been accepted by the IAM companies and something to support the in a client-server model. Not much outside of this (e.g., TSP)".
