Andor Kesselman 's Approach

Overview:

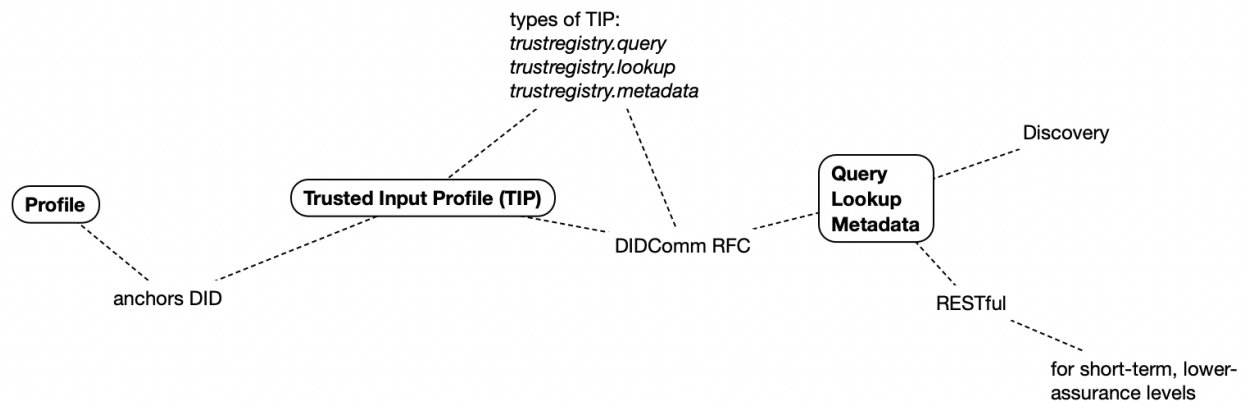

- Profiles
- Any service description
- Discovery mechanism

Thoughts:

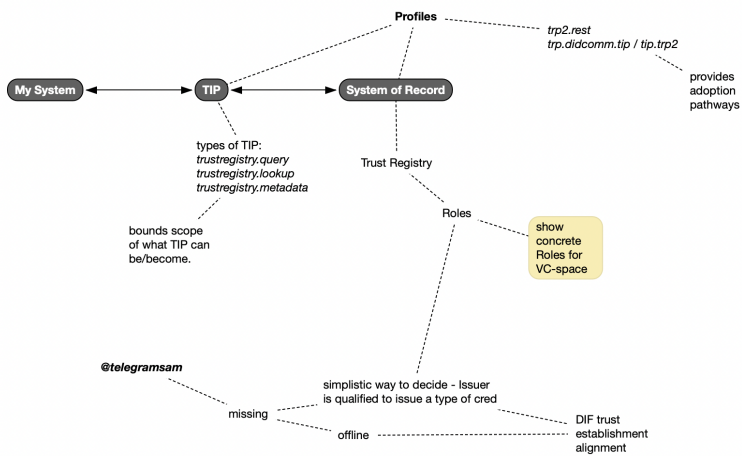

- We're talking at 3 levels:
 - Profiles - Being able to talk to a DID and say "so, what do you support?" helps create the interactions that we need.
 - TIP - Trusted Input Protocol - a generic pattern of getting information (inputs) to make trust decisions/
 - Trust Registry Inputs (outputs of Trust Registries) - focused on getting data out of systems-of-record that already exist (or that are being created)
- Parallel Efforts (see SSHOT 3)
 - These three things aren't in conflict and can be worked in parallel
