Enterprise - Identity and Access Management

Industry sector: Information Technology

Objective

Enabling the alignment of Enterprise IAM and Trust-Over-IP communities. Accelerate real-world value for enterprises and individuals.

Deliverables

1. Identification of key Enterprise use cases.
2. Publication of use case solutions.
3. Technical coordination among vendors, OSS projects, and other stakeholders.

Proposed Schedule

- First Use Case published by Q1 2021

PoC	Investigation	Notes
001	Decentralized Authentication and Authorization	
002		
003		

Communications

Zoom Meeting & Password to be distributed to Task Force participants prior to meeting via mail list.

Participants

Please come join us in accelerating Trust Over IP adoption in the Enterprise...
Edit the table below....

Name	Affiliation	Ice Breaker (Comments, Interest, Objectives, Opportunities...
Ken Adler	ThoughtWorks	Interest: To deliver innovative, business-value-returning Authorization (...and Identity & AuthN...) solutions for Enterprises and NGOs.
Jim St.Clair	Dinocrates	Interest in discovering use cases and PoC opportunities
Tim Hinrichs	Styra	Provide unified authorization (especially) for cloud-native applications and infrastructure
Aeneas Rekkas	ORY	Maintains a popular Open Source Auth* Ecosystem
Ajay Jadhav	AyanWorks	To standardize the integration efforts with existing OIDC-based IAM platforms. Will soon start working on a POC for remote user authentication (post COVID-19) using combination of FIDO & Trust Over IP stack.
Vinod Panicker	Wipro	Working on a community project to re-purpose TheOrgBook for the city of Kochi .Would like to explore specific use case for IAM (Identity & access Management)
