

2020-10-12 CTWG Meeting Notes

Date

12 Oct 2020

Attendees

- [Drummond Reed](#)
- [Dan Gisolfi](#)
- [Rieks Joosten](#)
- [David Luchuk](#)
- [sankarshan](#)
- [Scott Perry](#)
- [Scott Whitmire](#)
- [Paul Knowles](#)
- [Steve Magennis](#)
- [Victor Golubkov](#)
- Kimberly Linson

Goals

- Share status of different efforts contributing to the CTWG

Recording - [link](#)

Discussion items

Time	Item	Who	Notes
5 min	Github setup for CTWG	Dan Gisolfi	<ul style="list-style-type: none">• Dan gave an update to the setup that he has done with Daniel Hardman
25 min	Update from ESSIF-Labs	Rieks Joosten	See notes below
15 min	Semantic Domain WG proposal for Global Industry Sector Classification	Paul Knowles	See notes below
10 min	ToIP governance metamodel vocab	Drummond Reed	See notes below

Notes

- Rieks gave [a demo of the work going on at ESSIF-Labs](#) showing how the concepts and glossary are created in Gitlab and then rendered using Docusaurus.
 - This is all vocabulary that can become part of the ToIP corpus
 - The ESSIF-Labs project is 3 years; it is nearing its first year anniversary
 - They are looking at ToIP as the ultimate home for the ESSIF-Labs vocabulary work
- Paul discussed a proposal from the [Semantic Domain WG](#) (SDWG) on Global Industry Sector Classification
 - A lot of the ecosystems being developed in the Ecosystem Foundry WG are sector-specific
 - Paul wanted to show how the GISC can be tied into the Glossary and Terminology
 - Drummond asked the questions about how "instance vocabularies" like GISC related to "class vocabularies" like the ToIP Glossaries will mostly define
 - Rieks said that it fits the definition of **code lists** that provide the enumerated list of valid options for instances of a class
 - Most code lists are generated by consortia and will be referenced by glossaries like the ToIP Glossary
 - Paul agreed that most of the "classification" work should be in the SDWG
- Drummond shared a proposal for [the ToIP governance metamodel](#) that illustrates the kind of terms that the Governance Stack WG is going to need
 - All of the terms in First Letter Caps are proposals for the ToIP Governance Glossary

Action items
