5 mins	<ul style="list-style-type: none"><li>• Introduction of new members</li><li>• Any general announcements, news, that could be of interest to the TF</li><li>• Last week's action items</li></ul>	All	
40 mins	A proposal to initiate a deliverable on Authentic AI : request for comments and interests	Wenjing Chu	<ul style="list-style-type: none"><li>• This will be the second iteration of draft proposal for soliciting feedbacks/interests. If there's sufficient interest to pursue, we will come back to have a deeper discussion on Dec 21 (which will be the last meeting of TF for this year).</li><li>• We discussed the document and made updates to the document. See document.</li><li>• We reviewed the draft <a href="#">Wenjing Chu</a> created and all the comments we had received on the google doc. The proposal is to produce a timely report on this hot topic but stay in the authentic AI / trustworthy AI area which intersects TolP's tool kit (e.g. VIDs, TSP, ACDC, ... ).</li><li>• <a href="#">Daniel Bachenheimer</a> questioned why it's only "authenticity" - <a href="#">Wenjing Chu</a> explained that he is borrowing the concept from C2PA where authentic content meant not only authenticity of the author/creator but also integrity of the image (not being tampered with). One of the first comments in the google doc is also defining terms clearly as part of the work.</li><li>• One of <a href="#">Steven Milstein</a>'s suggestions is to have a 'case study' to focus application use cases. <a href="#">Wenjing Chu</a> proposed e.g. on RAG style AI applications. We had a discussion and agreed we should also generalize RAG into dataset management to avoid closely tying to a solution that may become dated or narrow quickly.</li><li>• We had a discussion around using C2PA for content authenticity (through provenance metadata) and use VID + TSP for communication of such content therefore combining two techniques for a complete solution.</li><li>• We had a discussion on parties in AI ecosystem e.g. consent, agreement, license, leveraging VID + TSP + ACDC etc. and apply such a solution to the case study.</li><li>• We also discussed, even though we should start with a case study, if we get more attention and contribution, we could apply the same solution scheme to other use cases.</li><li>• We will recap and resume the discussions at the Jan 18 meeting in the new year.</li></ul>
10 mins	Happy holidays!	ALL	<ul style="list-style-type: none"><li>• This is our last meeting of 2023.</li><li>• Do we keep the current time slot for 2024?</li></ul>

0 m ins	<ul style="list-style-type: none"><li>• Review decisions /action items</li><li>• Planning for next meeting</li><li>• AOB</li></ul>	Ch airs	<ul style="list-style-type: none"><li>• We will cancel Jan 4 and restart on Jan 18, 2024.</li><li>• Keep the same time slot (and discuss on Jan 18 if there're needs to adjust)</li></ul>
