Common kinds of data models include Hierarchical database model, Relational model, Network model, Object-oriented database model, Entity-relationship model, Document object model, Entity-attribute-value model, Star schema and Object-relational database model. The data semantics across these common database models can be harmonized using OCA.

- Logistics and miscellaneous (Paul—10 mins)
  - SDWG representative for the new Operations Team
    - The purpose of the Operations Team is to create a small group of ToIP members who will share information on the workplans of our WGs, help ensure that draft deliverables are advancing as intended through the stages of the ToIP workflow, resolve any bottle-necking that arise around decision-making/approvals and discuss issues such as (for example) introducing firmer parameters for the creation of TFs under all WGs.
    - The Operations Team will not be directing or otherwise interfering with the development of content and deliverables in the WGs themselves.
    - Possible group representative: Nick Nayfack
