Agenda

Guiding Goal: Mitigating correlation attacks which might unblind the identity of a governing entity.

- Welcome (Paul—2.5 mins)
- Newcomer Introductions (WG—2.5 mins)
- Task Force Updates (WG, 5 mins)
 - [Imaging TF](#) (Scott)
 - [Medical Information TF](#) (Scott)
 - [OCA-FHIR FG](#) (John)
 - The OCA-FHIR FG are WIP with the Base Schema transformation and addressing the rich schema processing per the examples from last week.
 - Investigating and documenting a potential RFC. Hope to have something to share with the SDWG next week.
 - Meetings: Switching to bi-weekly every other Thursday at 08:00am PT. The next meeting will be Thursday, December 3rd.
- This will allow team members to attend the Notice and Consent bi-weekly meetings in the off weeks.

Building an Identity Correlation Bitmap

The creation of a dynamic bitmap that constantly evolves each time an assessor identifies a correlation risk between attributes that could potentially unblind the identity of a governing entity. The numbers in the circles are incremental upon assessors identifying an instance of correlation.
