10 mins	AOB - Ecosystem White Paper Task Force reminder - Members can sign up for this Task Force on the wiki page	All Members

Presentation

Ecosystem WG M...mber 2020.pptx

Recording

[Meeting recording](#)

Agenda & Note

1. Welcome and Linux Foundation antitrust policy
2. Introduction of new members
3. Ontario Government Market Consultation
 - a. [RJ Reiser](#) - introduction to the [initiative](#) (the link to the questions); the Ontario Govt has a plan to have a digital identity by 2021
 - b. [Darrell O'Donnell](#)] the response has around 38 pages of content. 3w ago the Ontario Govt issued a market consultation (a form of RFI) - the questions in the document were really good (~20 odd questions; see link); multiple organizations viz. Sovrin are also responding to this. ToIP intends to take this content and use the content later in future work (even though this was a Confidential Consultation)
 - c. [Karl Kneis](#) - what did we learn from this exercise? Are there rough spots in our own thinking related to the ToIP vision? [Darrell O'Donnell](#) - there has not been anything by way of contentious issues. What is the ToIP's remit for establishing a Trust Layer for the internet - what is the set of outcomes to drive etc
 - d. [David Luchuk](#) - the presentation from the Minister ranged across topics also included an idea for a digital identity model to support service transformation for the government and being based on digital credentials. Examples of COVID-19 response etc were highlighted; examples of farmers registering their vehicles - shifting towards to the use of credentials connected to a secure digital ID would benefit both citizens and government
 - e. [Jay Fischbach](#) -Ontario is also involved in DIACC - should ToIP would also be engaging with DIACC? [Darrell O'Donnell](#) remarks that this is an avenue which can and perhaps should be explored.
4. [Solution Pack \(Implementation Plan\) Task Force](#) - update by [Steve Magennis](#)
 - a. Next week would be when [Eric Drury](#) will make available first drafts of the content for wider review and discussion
 - b. [Eric Drury](#) - focusing on the first couple of phases would help in creating better content for outreach and offering guidance
 - c. [Karl Kneis](#) clear, simple guidelines would be a good approach towards adoption of this content. How does the focus and on-going work at the Semantics WG plug in to this effort (see [Paul Knowles](#))? [Drummond Reed](#) - the group is like an overlay on the whole stack and not specifically tied to the layers.

Decisions

- Sample Decision Item

Action items

- Sample Action Item
