Data collection, data storage, data exchange

Ingestion is the art of collecting data and storing it.

(data inputs)

Formatting is converting a date, time, number, message or other object from its internal representation into a string.

Digestion is the art of processing data into a format that value can be extracted from.

- 2.) **Storage** representation
(data capture)

- 3.) **Exchange** representation
(data outputs)

Parsing is converting a string to an internal representation of the date, time, number, message or other object.
