- Announcement of [COVID-19 Credentials Initiative \(CCI\) Schema Task Force](#) at [LF Public Health](#) (Paul—15 mins)
 - *Schemas and Profiles* are domain-specific (e.g., a demographics schema or demographics profile). *Forms and Credentials* are a digital representation of a paper document (e.g., a visa waiver form or visa waiver credential). For this task force, we want to stay domain-focussed so that there is a separation of scope with the [#cci-vaccinereadingsf-us](#) group. The differentiation between profiles and credentials is important when it comes to data storage and portability.
 - LF Public Health slack channel: [#cci-schema-tf](#)
