Meeting -

Agenda & Notes

1. Welcome and Linux Foundation antitrust policy
2. Introduction of new members
 - a. No new members on today's call. 44 members have joined the call.
3. **University of Jyväskylä, Finland:** Students present their projects based on SSI. All the projects seem to validate the need for Open Standards and the need for a Platform like ToIP.
 - a. Nicky Hickman "What I really loved about both these ideas was that it really focused on solutions around people rather than industries."
 - b. Sankarshan "It is quite a thing to see how some of the existing patterns and use cases are being considered into the project ideas but with additional refinement of focus. This is very promising. We might want to highlight the recording of this call to a wider group of ToIP members!"
 - c. Drummond Reed "I was wondering if the team had seen this, which I only became aware of this past week: <https://servnetwork.org/>"
 - d. The team provided a SSI benefits, challenges and growth scope survey. www.surveymonkey.com/r/J2CL9YH
 - e. They are participating in the trust Assurance Task Force lead by Scott Perry. Karl Kneis would like the results to become a white paper.
 - f. We will schedule a future call to focus on "Blockchain Governance Compass".
4. Adrian Doerk Growth Factors of SSI solutions in Europe
 - a. Very good presentation and lots of details. [see link](#)

Action Items

1. We will schedule a future call to focus on "Blockchain Governance Compass".
