April 9 2021

10AM ET

- Paul to draft up date schema by Monday (and mapping methodology); test and vax data quite similar
  - Rajesh to support
- Identify "market / business people" to help shape narrative
- All to look at user journey maps
- Rebecca / Jim / Trev to make sure rules engine and data model are synced up

April 8 2021

10AM ET

- Brian to set meeting with Learning Health Communities to discuss data models
- Paul M. to review drafting template and suggest authors for each section
- Rebecca to meet with Paul K & Brian P to discuss next steps on Paul K data schema work
- Short discussion on WHO decision around ICD-11

April 7 2021

10AM ET

- Discussion on operationalizing CCI schema (Paul M. to look at draft template)
- Rebecca / Paul K. / Brian to meet Thursday to discuss next steps

April 6 2021

10AM ET

- Prep for drafting group meeting (review agenda)

April 5 2021

10AM ET

- Pull in David Janes from Paper Creds group to look at JSON-LD (Tony to ask)
- Need to decide whether we should split data model and content (add to team meeting agenda)
- Short intro from Paul Knowles on CCI schema mapping
- Need to understand CDC vs. EU data (missing testing from CDC; CDC typically requesting more info than EU)
- Discussion on terminology; can combine credentials into a pass

April 2 2021

10AM ET

- Everyone to review links to potential data models
- Need to identify drafters next week, expert in JSON-LD, and EU liaison (EU subgroup in CCI?)
- Make sure to focus on operational / practical implementation (content + wrappers)
- Review template deliverable

April 1 2021

10AM ET

- Everyone to add links to potential data models
- Folks are onboarding onto google drive and links
- Will continue to hold a weekly work meeting (Tuesdays)

March 31 2021

<u>10AM ET</u>

- Everyone to add links to potential data models
- Chris to share MITRE emails with Rebecca
- Rebecca to send template for deliverables
- Request for volunteers to look for subsets and supersets

<u>8PM ET</u>

March 30 2021 (Kick-Off Meeting)

- Need to explore subset vs. superset of data
- Conduct kick off exercise; take some of the existing models and identify the subset and superset across them
- Questions of what will be asked of the data?
- Need to closely align with rules engine and identity binding teams
- Use case will be travel with a focus on COVID-19 PCR tests and vaccinations, but with "hooks" for extensibility to other use cases as appropriate
- Recording - *LINK*
