| 40 min | Consent, Consent Receipts, and Associated Ramifications | Everyone |
| 14 min | Planning Next Steps | Everyone |
| 2 min | Wrap up | Trev |

## Recording - *Link*

### Notes

- Did the IP and antitrust note.
- Announcement of the snapshotting of the drafts.
- We discussed the glossary.
- Jan brought up consent and how to coordinate with Consistent UX.
- Talked about the new EU Digital Green Certification regulations. Chuck is going to review.
- We discussed consent receipts.
- Chuck brought up model disclosure, and how it applies across zones.
- Drummond showed the credential trust triangle. Drummond asked about the data once it's in the hands of the holder (their data) and whether the issuer needs to be concerned on the use of the data.
- Jan noted that GDPR hasn't yet mapped the "transfer" of data from the issuer to the holder. There's a bit of a conflict here.
- Chuck provided some more details on this from the law's point of view.
- We discussed some more on the EU/EC Digital Green Certificate.
- We discussed the need for use cases for policy makers, and how this fits in.
- The governance framework is going to need some direction here.
- Chuck brought up the impending directions coming from the Biden administration.
- Jan has some information on the consent cycle.
- Chuck would like information on who we are expecting in the US context to serve as issuers. There are a lot of different processes under which vaccines are being issued. There are multiple levels of hops between vaccine administration and issuance. Identity Binding has been looking at this.

## Chat Log
