Update on Good Health Pass

Update on Good Health Pass provided by Darrell O'Donnell

Indicio Introduction & AMA

Introduction to Indicio networks provided by Lynn Bendixsen

What can be frustration points? Technical matters are usually sorted out quickly but formal matters (e.g. document signatures) may be time consuming

Could auth rules be used to create trust registries? Auth rules define privileges for functions which can be executed on the network; trust registry is more a verification list not a transaction permission list

IDunion Introduction & AMA

Introduction to [IDunion](#) provided by Andre Kudra
