- WHO SVC Guidance

Recording - *Link*

Notes

1. Welcome and Linux Foundation antitrust policy - http://www.linuxfoundation.org/antitrust-policy

1. Document Modification Reviews
    a. Darrell will spend some time on the Intro and Background sections. Dakota's feedback will be accommodated.
    b. Minor edits were accepted largely.
2. Verifying Issuer/Verifier - access control
    a. Issuer List - needs authentication
    b. Verifier List - should be globally visible

We are writing the policies and the specifications that are the GHPC GF. This includes the query protocol and the interfaces.

Discussion around which trust registry a re-issuer such as the rules engine would use.

Thais would likely be external to GHPC, something such as EU Pass or ICAO Smart Vac.

This point needs to be made clear in the document.

Also the point that there is no GHPC trust registry. GHPC is only defining the policies, protocols, and recommended interfaces.

Action Items

1. Darrell will focus on the section that describes the topics covered today.
