2021-05-11 Consistent User Experience Drafting Group Meeting Notes

Attendees

- Chris Justice
- Stacey-Ann Pearson
- Rebecca Distler
- Hisanori Sato
- Kaliya Young
- Eric Doherty
- Chester Drum
- Jo Cooper
- Steve Armitage
- John
- Alessandro Minucci
- Dan Bachenheimer

Agenda Items

Time	Item	Who
2 min	Welcome & Antitrust Policy Notice	Stacey
15 min	Family Passes	Stacey
20 min	Multiple Passes	Stacey
15 min	Verification & Identity Binding	Stacey
3 min	Wrap up	Chair

Recording

Topic: Good Health Pass - Consistent User Experience
Start Time : May 11, 2021 08:32 AM

Meeting Recording:
https://zoom.us/rec/share/OUe_6GROnT65-Cl2S5p4MT1A-gWwwqWI9O8Uz1_xvlij2wm_G2CmtlFtLcXywD3V.bK_yx5V2gYFhYg2u

Notes

1. Welcome and Linux Foundation antitrust policy

2. Family Passes

- Have the identity pieces for all difference users - if it's an adult, need some attestation that they're the guardian
- Either chose not to use it or don't have it
- Children vs. families (child won't have a mobile phone, but need a parent or guardian good health pass to have information recorded)
- Being a little more specific - families with children or adults without ability to travel on their own (add family groups)

3. Multiple Passes

- Don't want to have to download multiple apps; from UX, not good
- Could we have multiple credentials in one? Too many different QR codes or passes
- Airline reservation systems to cope with multiple passes?
- Express lane (faster immigration lines if you have things ready); might be a useful construct to use
- Could we combine vaccine and test? Would have to share both your test credential and vaccine credential
- "Good Health Pass Credentials" - what they have in wallet is written to W3C standard that is emerging for ZKP; a person can receive a request from a verifier and present everything at once, even if it's from different issuers. Goal is to accept things from entities that don't follow GHP standards
- Low uptake in Heathrow; if you've done everything in advance, get to go through quicker (it's a choice of airlines and airports); expedited lines out of scope (document what's needed for pass, not logistics of expediting lines)

4. Methods

- Not all airports have QR or NFC readers
- Manual verification of credential

5. Zone 0

- Solutions coming online to solve this problem
- Critically important piece of the puzzle - we will need to do more research before getting to airport / on plane, otherwise won't know what they need to do
- Important for semantic interoperability

6. Late Identity Binding

- Is there value to authoritative digital identity binding to the paper
- Trusted authority could look at it and add value?

Action Items

1. TBC
