Notes

- Antitrust and IP announcement.
- We're pens down with our draft sent to copy editing. A huge thanks to everyone's hard work.
- We will be cancelling next week's meetings.
- There was a short conversation about work being done elsewhere that we may want to refer to, especially in terms of implementation.
- Drummond noted that there is an effort underway to help line up additional reviewers of the work done by the Working Group.
- Jan asked Drummond about the possibility of discussing the interpretation of GDPR and data transfer agreements with Drummond.
- There was some questions around some of the approaches being taken in the UK.
- Kaliya brought up the importance for organizations/people who are commenting on identity-related approaches to be pointing to specific systems, as there is a wide breadth of implementation approaches that make a large difference in terms of how "good" the system is.
- We ended today's meeting quite early.

Action Items

1. *None*
