10 mins	Terminology Broohaha	Darrell O'Donnell	When we query a trust registry to answer "does this registered entity have _____ to do the thing?" Is it:
			
			• authorization; or
			• permission
			
			Do I check the Trust Registry for "authorizations" or "permissions"? Given the NIST definitions
			
			Discuss...
			
			NIST (NOTE: NIST has MANY definitions for authorization. Best is below):
			
			• permission: Authorization to perform some action on a system.
			• authorization: Access privileges granted to an entity; conveys an "official" sanction to perform a cryptographic function or other sensitive activity.
			   ○ TelegramSam - leave in "cryptographic function".
			   ○ Andor: does it add clarity (i.e. cryptographic function).
			   ○ debate is about cryptographic vice gov+tech
			      ■ implicit (leave out "cryptographic function" vs. explicit ("action uses cryptography").
			   ○ possible - defer to NIST (leave as is) and see if that breaks thinking/flow.
			      ■ RAISE issue - do we need something else (another term; revised definition).
			
			DECISION: NIST "authorization" will be used as is.

10 mins	Special topic #3		
5 mins	• Review decisions /action items • Planning for next meeting	Chairs
