

2021-07-01 TRTF Meeting Notes

Meeting Date

- 2021-07-01 10am ET

Attendees

- [Drummond Reed](#)
- [Ken Adler](#)
- [Marie Wallace](#)
- [Mike Richardson](#)
- [Jim St.Clair](#)
- [Riley Hughes](#)
- [sankarshan](#)
- [Lucy Yang](#)
- [John Walker](#)

Main Goal of this Meeting:

Discuss the primary deliverables and action items to be performed until the next meeting.

Agenda

Time	Item	Lead	Notes
5 min	Start recording Welcome Antitrust Policy Notice: <i>Attendees are reminded to adhere to the meeting agenda and not participate in activities prohibited under antitrust and competition laws. Only members of ToIP who have signed the necessary agreements are permitted to participate in this activity beyond an observer role.</i> Agenda review	Chairs	
5 min	Introduction of new members	All	
5-10 mins	Report on action item from last week: ACTION: Drummond Reed to create the X.509 PKD interop wiki page and baseline proposal	Drummond Reed	<ul style="list-style-type: none">• X.509 PKD Support - wiki page
5-10 mins	OpenAPI in github and Trust Registry Relay decision	Darrell O'Donnell virtually Drummond Reed leading discussion	<ul style="list-style-type: none">• discussion document here• Loom video presenting Darrell's viewpoint• OpenAPI YAML file (github)
15 mins	Discuss the GCCN Trust Registry Network Definition document	John Walker Lucy Yang	
20 mins	Other technology approaches and open discussion <ul style="list-style-type: none">• Ken Adler TrustRegistryNetworks.org• TRAIN - Mike starting talking to Fraunhofer - they just released the code - Mike can be a point of contact	All	
10 mins	Review of action items & prep for next meeting	Chairs	

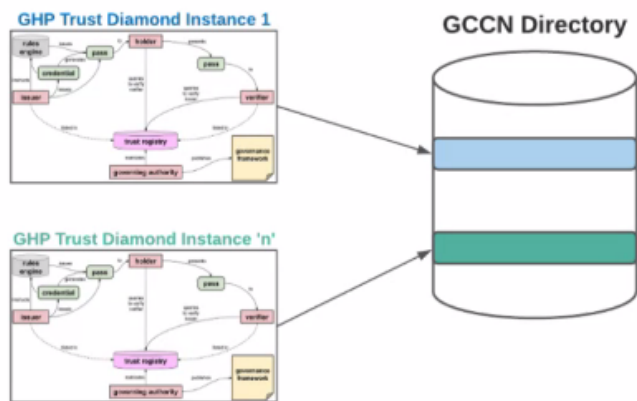

Recording

Notes

1. New member introductions
2. [X.509 PKD interop wiki page](#) and baseline proposal - [Drummond Reed](#)
 - a. This proposal is the beginning of discussion about how the Trust Registry Protocol can include conventional X.509 public key directories (PKDs)
3. OpenAPI in github and Trust Registry Relay decision - [Darrell O'Donnell](#)(virtually)
4. Discuss the [GCCN Trust Registry Network Definition document](#) - [John Walker](#) and [Lucy Yang](#)
 - a. [John Walker](#) shared the strawman document [Defining the GCCN Trust Registry Network](#)
5. Other technology approaches and open discussion
 - a. [Ken Adler](#) - [trustregistrynetworks.org](#)
 - i. This came out of an effort to expose cryptographic primitives in a standard way.
 - ii. The GCCN use case was a "deceptively simple" example of the need.
 - iii. So Ken and his team started an open source project.
 - iv. Requirements included: operating at the edge, low resource consumption, policy-as-code, describing governing authorities and digital trust ecosystems in a declarative manner.
 - v. Currently several Thoughtworks devs are working on the project
 - vi. The hope is that the project can fit within various architectures that need these capabilities.
 - vii. Location:
 - b. TRAIN - [Mike Richardson](#)
 - i. ACTION: [Mike Richardson](#) to see if he can arrange for TRAIN rep to come to the July 15 meeting
 - ii. <https://gitlab.grnet.gr/essif-lab/infrastructure/fraunhofer>
6. Discussion of machine-readable rules
 - a. [Jim St.Clair](#) is assuming that there is a need for rules for ultimately making trust decisions
 - b. [Ken Adler](#) provided feedback that the baseline was just verifying DIDs and URIs
 - c. [John Walker](#) shared that the rules about something like Good Health Pass travel requirements will be in a governance framework ("inside the trust diamond"), but that they don't necessarily have to be in machine-readable rules, but the different TRs can have different levels of support for machine-readable rules
 - i. So the business rules reside at two levels - what are the rules of interacting with the TR, and what are the rules with the ecosystem for a particular TR
 - ii. We need to explore the machine-readable mechanisms
7. Review of action items & prep for next meeting
 - a. [Darrell O'Donnell](#) Focus on a definition of the MVP
 - b. [John Walker](#) the set of user stories that will give us the requirements for the "absolutely bare bones"
 - c. [Lucy Yang](#) will share a diagram of the user flow from a GCCN standpoint

GCCN Trust Registry Network - A Directory of Trust Frameworks

Decisions

☐ None

Action Items

- ☐ ACTION: [Mike Richardson](#) to see if he can arrange for TRAIN rep to come to the July 15 meeting
- ☐ ACTION: [Darrell O'Donnell](#) to focus on a definition of the [Trust Registry Protocol](#) MVP
- ☐ ACTION: [John Walker](#) to define the set of user stories that will give us the requirements for the "absolutely bare bones"
- ☐ ACTION: [Lucy Yang](#) to share a diagram of the user flow from a GCCN standpoint
