Meeting Notes

- We discussed the new direction for the meetings focused on topics rather than projects
- The initial list of topics we have identified are:
 - End-user UX (technological, complexities, requirements)
 - Future of Storage (what does it look like in 20, 30, 50 years)
 - Privacy, Access Control, and Encryption
 - Portability between personal data storage
 - Realtime vs Asynchronous collaboration
 - Maintaining Public Datasets
 - Consent as a function
 - Data consent and governance
 - Data access and portability
 - JSON to JSON-LD transition from location to content-based
 - Consent embedded within data
 - Metadata queries, + what might be different for metadata consent and governance?
 - Storage overhead of authenticated data
 - Problem-oriented design/discussion
 - Need requirements/problems in simple sentences
