Agenda Items and Notes (including all relevant links)

Time	Agenda Item	Lead	Notes
3 min	<ul style="list-style-type: none">• Start recording• Welcome & antitrust notice• Introduction of new members• Agenda review	Chair	<ul style="list-style-type: none">• Antitrust Policy Notice: <i>Attendees are reminded to adhere to the meeting agenda and not participate in activities prohibited under antitrust and competition laws. Only members of ToIP who have signed the necessary agreements are permitted to participate in this activity beyond an observer role.</i>• New Members:
10 min	General announcements	All	Updates from TSWG members of general interest to the group.

20 min	Task Force Reports	TF Leads	<p>Technology Architecture TF — Wenjing Chu Drummond Reed</p> <ul style="list-style-type: none"> Work on this was delayed until after IIW. Drummond Reed is going to be back on the job of converting it to Spec-Up and publishing Public Review Draft 2 before EIC. <p>Trust Registry TF — Andor Kesselman Antti Kettunen Darrell O'Donnell</p> <ul style="list-style-type: none"> No direct feedback at the moment—some conversations with Animo. Judith asked why an API-based registry vs. a downloaded file such as specified by the DIF Trust Establishment specification. <ul style="list-style-type: none"> Darrell O'Donnell explained that the API model is more flexible and can handle more use cases, including non-credential based use cases. The API model also enables existing registries to expose the registry data that they already have in a standard way. Judith also asked about how the OpenID Federation compared with the TRP? Darrell confirmed that an OpenID federation should also be able to expose their data via the TRP. Judith also asked about the Open Identity Exchange proposal for a "policy resolver" that could read and resolve what needs to be done to apply policies from one ecosystem to another. <ul style="list-style-type: none"> This could apply to producing derived credentials. Jo asked the question about whether the TRP will be implemented as a trust task protocol that runs over the TSP. <ul style="list-style-type: none"> We discussed the various reasons it might be helpful to have a TSP relationship with a trust registry: <ul style="list-style-type: none"> For strong security. For privileged access. For privacy-protected access. For a persistent connection, such as for push updates. <p>Trust Spanning Protocol TF — Drummond Reed Wenjing Chu Samuel Smith</p> <ul style="list-style-type: none"> See the TSPTF meeting notes. <p>ACDC TF — Samuel Smith Phil Fearheller</p> <ul style="list-style-type: none"> Sam's presentation on CESR https://github.com/SmithSamuelM/Papers/blob/master/presentations/CESR_20_IIW2024A.pdf <p>AI & Metaverse (AIM) Technology TF — Wenjing Chu</p> <ul style="list-style-type: none"> Wenjing shared that they are proceeding nicely with their Authenticity for AI workstream. <p>Credential Exchange Protocols TF — Mathieu Glaude</p> <ul style="list-style-type: none"> - <p>did:webs Task Force — Lance Byrd Phil Fearheller Markus Sabadello</p> <ul style="list-style-type: none"> - <p>X.509 VID Task Force — Eric Scouten Wenjing Chu</p> <ul style="list-style-type: none"> Eric, Drummond, and Scott Perry held a session to discuss the technical and business case for CAs adding a DID or VID to the Subject Alternative Name field of an X.509 certificate. There was a high degree of interest in "building that bridge"—including from one CA attending (Lori Groth of Digicert - https://www.linkedin.com/in/loriegroth/).
